Enterprise

Contact our Customer Success Team for pricing, priced per active user.

Health APIconnect™

Document OCR Handling

Health NLPconnect™

Vision AI Image Recognition Handling

White-label Branding

Also includes Text Commands feature being fully configurable.

Bolt-on licenses available to be bought individually.

Health APIconnect™

Connect to process automation and low-code API platforms to trigger automated workflows across your organisation's app ecosystem.

£500/mth

Per active automation platform connected. Billed annually.

Health NLPconnect™

Contextual understanding of clinical language. Natural Language Processing (NLP) enables key word and context recognition of text and voice, license includes custom development for any Use Case.

Built-in RPA capability

Robotic Process Automation (RPA) enables automation and integration with Connected Systems where a direct API Connector is not available.

White-label Branding

Customised naming of bot and brand colours to match your organisation's branding.

Vision AI Image Recognition Handling

Integrates Google Vision API with Alphalake's file handling digital assistant capability

Document OCR Handling

For document processing that uses Optical Character Recognition (OCR). Use for document handling where format is the same or there is little variability or add Machine Learning (ML) for adaptive capability to process large amounts of variable data.
